REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The Applicant claims a battery pack comprising a housing having a plurality of cooling openings, at least one separation wall formed of a plurality of current cells arranged flow-tight adjacent to each other, the separation wall arranged between at least two cooling openings and projecting flow-tight into an interior of housing only at a side of the openings, whereby the at least one separation wall is cooled by an air stream flowing therearound along opposite sides of the at least one separation wall in opposite directions.

Applicant claims a battery pack wherein at least one separation wall projects flow-tight into an interior of the housing only at a side of at least one first opening and at least one second opening, and wherein an air volume enters through the first opening and exits through the second opening, and flows around the separation wall, along opposite sides of the separation wall in opposite directions.

In the prior art of record, Tsuchiya et al., JP 2002-042753, teaches a battery pack comprising a housing having a plurality of cooling openings, at least one separation wall, the wall arranged between at least two cooling openings.

However, the prior art of record, taken either alone or in combination, fails to disclose or render obvious, a battery pack whereby the at least one separation wall is cooled by an air stream flowing therearound along opposite sides of the at least one separation wall in opposite directions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
